### ABOUT ME

I am passionate about building high-quality web applications that deliver exceptional user experiences. I am a highly skilled senior full-stack engineer with expertise in MERN stack development.

I am constantly looking for new technologies and tools to stay up-to-date with industry trends and best practices, and I am committed to delivering top-notch solutions that exceed expectations.

Seeking a new opportunity to apply my experience and collaborate with a dynamic team. I am confident in my ability to deliver exceptional results and drive innovation. Let's build something great together!

## EXPERIENCES

### MERN developer

Exvous Cloud Services - Since February 2022 - Part-time - United Kingdom

- Designed and developed responsive, user-friendly web interfaces using React, ensuring the best possible user experience for clients and end-users alike.
- Developed custom authentication systems using OAuth, JWT, and other industry-standard authentication protocols to ensure secure and reliable user authentication and authorization.
- Researched and evaluated new technologies and tools related to the MERN stack, continuously learning and staying up-to-date with industry trends and best practices to ensure optimal performance and efficiency of web applications.
- Integrated social login options, such as Facebook and Google, into authentication systems, providing users with a streamlined registration and login process.
- Utilized Stripe and PayPal APIs to build custom payment flows and handle complex payment scenarios, such as recurring payments.
- Used Git and version control tools to manage code changes and collaborate effectively with other developers working on the same codebase.
- Built web applications using Next.js, a powerful framework that provides server-side rendering, static site generation, and other advanced features to improve website performance and user experience.
- Implemented Redux with Redux toolkit, a popular state management library, to handle complex data flows in web applications and ensure consistency and predictability of application behavior.
- Implemented Stripe and PayPal payment integrations to facilitate secure and seamless payment processing in web applications, handling sensitive user data such as credit card information and ensuring compliance with PCI standards.
- Built custom user management systems to handle user registration, profile management, and account settings, ensuring a seamless user experience and high data security.
- Designed and developed custom dashboard systems for content management, enabling clients to easily manage and update their website content without the need for technical expertise.
- Built an online ecommerce platform from scratch, integrating with popular payment gateways such as Stripe and PayPal, and implementing advanced ecommerce features such as product catalogs, shopping carts, and order management systems.

### Full Stack Web Developer

Webnapp Consulting - November 2020 to January 2022 - Adelaide - Australia - South Australia

- Through my work at WebnappConsulting, I developed a deep understanding of web development best practices and gained valuable experience working in a fast-paced, dynamic environment.
- Collaborated with cross-functional teams to understand client requirements and deliver high-quality, responsive web solutions that met business objectives.
- Utilized my skills in front-end and back-end development to create user-friendly interfaces and optimize website performance.
- Leveraged Node.js and Express to build RESTful APIs, enabling seamless communication between front-end and back-end components of web applications.
- Worked closely with QA teams to ensure all code was thoroughly tested and free of bugs before being deployed to production environments.
- Managed web hosting on cPanel, including setting up domains, email accounts, and SSL certificates, and troubleshooting common hosting issues.
- Utilized cPanel to manage and monitor web server resources, such as disk space and bandwidth, and optimize website performance through caching and other performance-enhancing techniques.
- Configured and deployed web applications on Amazon Web Services (AWS), including setting up EC2 instances, configuring security groups, and creating load balancers to handle high traffic.
- Managed AWS services, S3 storage, Route 53 DNS, and AWS Simple Email Service to ensure the smooth operation of web applications and high availability.

- Worked with DevOps teams to automate server deployment and configuration using various tools, improving the efficiency and reliability of server management.

## SKILLS

### Frontend

- React.js
- Redux/Redux toolkit
- HTML5
- CSS3
- Sass
- JavaScript
- jQuery
- Next.js
- TypeScript
- Microanimations

### Backend Development

- Node.js
- Express.js
- MongoDB/Mongoose
- RESTful APIs
- EJS
- Authentication/Authorization
- SQL / Sequelize

### DevOps / Deployment

- Domain / SSL Management
- CI/CD
- Self-hosted Server
- Github Actions
- Amazon Web Services
- cPanel

### Side skills

- Beautiful Soup / Selenium
- Photoshop
- Illustrator
