🚀 EXPERIENCES

MERN DEVELOPER

Exvous Cloud Services - Since February 2022 - Part-time - United Kingdom

- Developed responsive web interfaces using React/Next.js for optimal user experience
- Implemented Redux/redux toolkit for complex data flows and consistent app behavior
- Created secure authentication systems using OAuth, JWT, and industry-standard protocols. Also integrated social logins
- Utilized Stripe/PayPal APIs for custom payment flows
- Designed custom user management and content management systems
- Collaborated with cross-functional teams to deliver responsive web solutions that met business objectives
- Used Git for version control and collaboration with other developers

FULL STACK WEB DEVELOEPR

Webnapp Consulting - November 2020 to January 2022 - Adelaide - Australia - South Australia

- Gained expertise in web development best practices and worked in a fast-paced, dynamic environment
- Utilized front-end and back-end development skills to optimize website performance and create user-friendly interfaces
- Built RESTful APIs with Node.js and Express for seamless communication between web application components
- Managed cPanel web hosting and optimized website performance through caching and other techniques
- Deployed web apps on AWS, including EC2 instances. Worked with AWS S3, Cloudfront, AWS SES, and Route53.
- Collaborated with DevOps teams to automate server deployment and configuration for improved efficiency and reliability.

📦 PORTFOLIOS

BUILDABIZ

A comprehensive full-stack project aimed at assisting users in generating business ideas. The project encompassed various components such as sales plan, marketing plan, and Non-Disclosure Agreement generation. Behind the scenes, it utilized OpenAI APIs in the backend for these functionalities. Additionally, the project incorporated Stripe APIs for recurring membership payments.

Website

https://buildabiz.io/

HIREML

Utilized React.js as the front-end framework and Python as the back-end for developing RESTful APIs. Its purpose was to streamline the hiring process by providing a platform for businesses to schedule interviews. Additionally, the project incorporated Jupyter Notebook online to allow candidates to test their skills.

⚙ SKILLS

FRONTEND DEVELOPMENT

- React.js / Redux (toolkit)
- Next.js
- HTML5
- CSS3
- Sass
- JavaScript
- jQuery
- TypeScript
- Microanimations

BACKEND DEVELOPMENT

- Node.js
- Express.js
- MongoDB/Mongoose
- RESTful APIs
- EJS
- User Authentication
- User Authorization
- SQL / Sequelize

DEVOPS / DEPLOYMENT

- Domain / SSL Management
- CI/CD
- Self-hosted Server
- Github Actions
- Amazon Web Services
- cPanel

SIDE SKILLS

- Beautiful Soup / Selenium
- Photoshop
- Illustrator
